

2011 Regional Strategy

Strategic Objectives and Key Performance Indicators

Objective 1: To improve the quality of life for all people living in the region, particularly those who are most disadvantaged.

Regional Performance Indicators (RPIs)

1. Environmental Quality of Life Indicators

- 1.1. **Climate Change: Greenhouse Gas Emissions**
To reduce greenhouse gas emissions and improve energy efficiency in the region.
Key Performance Indicators (KPIs):
 - 1.1.1. Reduce greenhouse gas emissions per capita in the region.
 - 1.1.2. Increase the percentage of energy generated from renewable sources in the region.
- 1.2. **Water Quality and Availability**
To ensure a sufficient and high quality water supply for all people in the region.
Key Performance Indicators (KPIs):
 - 1.2.1. Increase the percentage of water supply from renewable sources.
 - 1.2.2. Reduce the percentage of water supply from non-renewable sources.
- 1.3. **Air Quality and Pollution**
To reduce air pollution and improve air quality in the region.
Key Performance Indicators (KPIs):
 - 1.3.1. Reduce the percentage of air pollution in the region.
 - 1.3.2. Increase the percentage of air quality in the region.
